

Player Development Guidelines

U14 Boys and Girls Soccer

Medfield Youth Soccer Overview

Medfield Youth Soccer Mission

Medfield Youth Soccer (MYS) is dedicated to providing all children of Medfield a place to play soccer. Our primary focus is on player development, having fun, and providing a safe environment.

- Player Development – our goal is to teach the players how to play soccer to the best of their ability. To accomplish this all players are to be given equal playing time during games and attention during practice.
- Having fun – the number one reason to play is to have fun. The number one reason not to play is that it's not fun. To promote fun we will encourage equal participation in practice and games, matching athletes' ability to their challenges, and by helping to set performance goals, rather than outcome goals.
- Safety first – it is important to always make sure that a safe and age appropriate environment is set for games and practice.

Player Development Guideline

The goal of this document is to:

- Establish clear and age appropriate goals and objectives so our coaches, players and parents know what we are working toward
- Establish objectives so coaches have a common understanding of which skills players should have when they proceed to the next age group
- Establish age appropriate priorities and focus areas in the four elements of the game (technical, tactical, psychological, and physical)
- Ensure consistency among our programs so we're all teaching the same way and using the same vocabulary
- Create confident coaches that are better prepared

U14 Player Development

Typically a U14 player that starts at age 12 will have 4 seasons of play before he/she move's up to U16's. A fall and spring season at age 12 in and the same at age 13 in the U14 program. Our goal is to develop their skills so they are prepared to move up to the next level. We can't expect these young players to master everything below in a single season, but taught consistently from season to season they will get it over time. Keep this in mind as you read through this document.

Key Objectives for the U14 MYS Program

- Have fun (players, coaches and parents)
- Players should be sharing the ball
- Focus on advanced skills
- Focus on intermediate tactics
- Individual, pairs and group activities up to 6-8 players

Transition Considerations

During the Fall, players typically move up in age groups so you will probably have a number of players on your team that have never played at this level before.

U12's moving up to U14's:

- Are playing on a much bigger field
- Are used to 8v8 vs. 11v11
- Have a positional understanding but not at this scale
- Will physically be challenged by the larger field

Typical Characteristics of U14 Players

1. all children are *maturing at different rates*
2. players need to warm-up and stretch - *muscle pulls and other nagging injuries are common otherwise*
3. players will typically understand *elemental abstract concepts and hypothetical situations*
4. they like to *solve problems*
5. peer evaluation is a constant
6. *egos are sensitive*
7. *coordination* may depend on whether or not they are in a *growth spurt*
8. *technique still needs to be reinforced constantly*
9. playing too much can lead to *overuse injuries*
10. playing too much and not feeling like they have a choice in the matter can lead to *burnout and drop-out*
11. keep asking the players to *be creative and to take risks* - we never want them to stop doing these things
12. ask for feedback from them - *they will tell you how things are going*
13. try to hand over *leadership and ownership* of the team to them
14. *keep it fun!!!*

Player Development Objectives

This document will help to identify key objectives within the four key areas of player development. The priority areas will evolve for each age group progression. The key areas of player development across all age groups and levels are:

Technical Development– These are the skills used to play the game, i.e. the “fundamentals”. This includes things like dribbling, passing, shooting, receiving, tackling, juggling, heading, etc.

Along with making sure players have fun, skills is probably the most important area for youth players to focus on.

Tactical Development – Tactics for youth soccer focuses largely on decision making, i.e. how players can make the correct decision given a particular situation. We should try to understand the progression of tactics and develop the players in the proper sequence, so that players are comfortable solving easier problems (1v1, 2v1) before they move on to solve more complex ones (4v4):

Psychological Development – For youth soccer, this relates to whether the player is having fun playing soccer, and other aspects such as how they deal with winning and losing, their level of motivation, and how they interact with teammates, coaches and their parents.

Physical Development – Fitness for youth soccer players can be largely achieved by just letting them play soccer, although some of the older age groups (U14 and maybe U12) may start incorporating speed and conditioning into practice games and activities.

U14 Player Development Objectives

The following key training priorities are recommended by US Youth Soccer and Mass Youth Soccer for coaches of U14 players. A focus on helping players develop these skills and basic tactics (and not intermediate or advanced tactics at this stage) is critical as it will serve as the foundation for skills and tactics that will be introduced when these U14 players move on to the next age group.

Over the next few pages we will go into the specific elements within each area that players will be encouraged to learn before entering the next age level.

U14 Technical Skill Priorities

Technical focus at U14 level should be a progression of those skills learned at lower levels plus the following:

Field Play - Technical Skills:

- Dribble with all sides of both feet (inside, outside, sole)
- Dribble out of trouble
- Dribble past someone (feints, fakes, crossovers etc)
- Quick changes of direction and turns (pullback, inside/outside turns, cruyff)
- Speed dribbling in traffic

- Soft first touch
- First touch away from pressure
- Receiving the ball with all parts of the body
- Shielding – Players should develop proper technique to shield the balls from opponents

- Shooting with both feet (with inside of foot and laces)
- Shooting for power, for accuracy and volleying
- Introduce proper volleying technique

- Passing with inside and outside of both feet
- Passing to feet and passing to space
- Ability to chip the ball
- Accurately play long passes (using laces)

- Juggling with both feet and thighs (allowing one bounce between juggles if needed)
- Throw-in technique
- Proper defending technique
- Block tackles
- Proper heading technique (attacking and defensive)
- Specific goalkeeping technique

Players should spend equal time developing both feet – this is very important!!!

Goalkeeping - Technical Skills:

- Proper positioning (hands and body)
- Body position around the goal
- Ball distribution (throwing, rolling, punting)
- Basic diving from the ready position.
- Collecting balls from the attacking player's feet.

Perform basic skills under increasing speed and pressure (i.e. less time and space)

At this age group, players should continue to focus on improving their basic skills / technique (i.e. dribbling, passing, receiving, shooting, etc.) by trying to execute them under increasing pressure. The coach can increase pressure by reducing the playing area (i.e. restricting space), allowing fewer touches of the ball (i.e. restricting time), etc.

U14 Tactical Skill Priorities

Tactical focus at U14 level should now be an important element in soccer at this level. Problem solving and making decisions for themselves are critical tactical elements in young players. Below are some of the tactical skills to focus on at this age-level.

Field Play - Tactical Skills:

- Combination plays (short passes, wall passes, overlaps and takeovers)
- Importance of the first touch
- Immediate transition from defense to offense or vice versa
- Attacking Concepts (possession, penetration, width, depth, mobility, support)
- Introduce basic defending concepts (pressure, cover, balance, compactness and depth)
- Player movement on throw-ins
- Penalty kicks
- Introduce position specific training (right fullback, left midfield, etc.)

Players should be exposed to these simple tactical scenarios and understand how to both attack and defend these game contexts.

- 1 v 1 (attacking and defending)
- 2 v 1 (attacking and defending)
- 2 v 2 (attacking and defending)

Continue to focus on basic tactical concepts

A lot of 1 v 1 duels should be incorporated into practice sessions to allow all the players to get plenty of opportunities to learn how to dribble past an opponent and how to stop one.

The basic roles of first and second attackers and defenders should be introduced through 2 v 1 and 2 v 2 games and activities.

Introduce basic combination plays and attacking / defensive concepts

At this stage, players should learn to combine with their teammates using short ground passes and wall passes. Overlapping and takeovers can be introduced to older or more experienced players. Players should also understand how to provide proper support to teammates with the ball and the importance of maintaining possession of the ball while attacking. On the defensive side, players should be familiar with the concepts of pressure and cover.

Goalkeeping - Tactical Skills:

- Calling for the ball when receiving with defending players
- Communicating with the other players on the team during the game

Introduce team tactics and coaching from the game

- Attacking tactics: The basic attacking concepts of depth, width, possession, penetration, mobility and support should be introduced.
- Defensive tactics: The basic defensive concepts of pressure and cover, balance, compactness, and depth should be introduced.\
- Coaching from the game: At this age group, the topics for some practices should be determined from the coach's analysis of prior games and observations of what needs to be worked on as a team.

\

U14 Psychological Development

Psychological focus at U14 level is a major priority. Fostering an environment where our players can grow in confidence, try new things and have fun whilst doing it are critical to developing well rounded players.

- **Keep it fun and enjoyable!!!** This will help foster a desire to play (intrinsic motivation)
- Build confidence
- Encourage imagination and creativity
- Foster our players to be part of a team
- Independent decision making
- Problem solving
- Encourage player to learn to deal with winning / losing
- Encourage players to watch games on TV
- Increase Demands
- Maintain Discipline
- Establish training targets

Keep it fun!!!

One of the most important aspects of psychological development for young players in the U14 age groups is for them to have fun. For most of them, if they are not having fun, they will most likely drop the sport. As a coach, you should strive to create an environment where the players, parents and you, the coach, are all having fun.

Allow the players to make mistakes and encourage them to make their own decisions

As players progress to U14, they play on larger fields and dribbling may not always be the best option. Players will need to start understanding when to dribble, when to pass and to whom, and when to shoot for goal. At this stage, they will often choose the wrong option, but as coaches and parents, we need to be patient with them and encourage them to make these decisions independently, especially during games. Aimless kicking or “booting” of the ball should not be encouraged.

At this age, the players are aware of the score and many parents and coaches are paying more attention to the results. You will start noticing many coaches and parents yelling directions from the sidelines. We should remind ourselves and the parents of our players that improving their play and having fun are the main objectives. As far as possible, we should refrain from yelling directions to the players during games, as it will hamper their ability to make decisions independently.

Reduce player dependence on adult guidance through “Guided Discovery”

In practice sessions, coaches should try to allow players to make mistakes and ask players how they could do things better and guide them to the correct answers, rather than telling the players what to do. This will help the players’ ability to solve problems and reduce their dependence on adults for guidance during games.

Teambuilding

U14 players tend to have a strong commitment to their team. This is a great opportunity to continue teaching young players about the value of teamwork and what it means to be part of a team (i.e. trusting your teammates, not criticizing them, etc.). Certain fun teambuilding activities can be done during some practices, especially in the beginning of the season when players may not be familiar with each other.

Increase demands

At this age group, the speed of development increases as physical and mental maturation improves. As a result, skill and tactical training should be designed to improve players’ mental toughness, concentration and diligence.

Establish and maintain discipline

At this age group it is a good idea to establish team rules at the beginning of the season. The coach should also set up penalties for not following these rules. It is a good idea to inform parents of the team rules and penalties. Players tend to be self-critical and rebellious at times but typically have a strong commitment to the team. The coach should ensure that he or she applies these rules fairly and consistently if they are broken during the season.

U14 Physical Development

Physical development is not a high priority for U14 soccer. Encouraging all players to play and participate and give their best is really all that's required. However some physical development can be incorporated into your practices and activities.

- Just play soccer
- Introduce stretching (static and dynamic) in some practices
- Proper warm-up, cool-down and stretching
- Introduce speed training
- Introduce conditioning

At this stage, speed training and conditioning can be introduced. As far as possible, try to incorporate fitness activities into regular soccer activities and games rather than have players run sprints or laps without the ball. Small-sided games, 1 v 1, 2 v 1 and 2 v 2 activities are good exercises for building fitness while working on ball skills.

Proper warm-up, cool-down and stretching is important to reduce the likelihood of injuries. You should incorporate light stretching after a warm up activity to start all practice sessions and before games. A cool-down activity followed by light stretching should be at the end of each practice session and after every game.
